DEAR SIR : You request a brief statement of such facts respecting the probable return 10. Are the meteors which do not proceed of the November meteors this year as are of made upon the subject; also, for a statement of some of the points to which the attention of observers should be called.

The fact of a periodic return of the meteors seems shown by the following facts: On the 13th of November, A. D. 1833, was a remarkable shower, ever to be remembered

by those who witnessed it. A similiar display of less intensity was seen over all Europe on the morning of the the 13th? 13th of November of the year previous. It was very generally spoken of in the newspapers of the day and formed the subject of at least two extended articles in the scientific journals.

On the morning of November 12th, A. D. 1790,a shower very like that of the year 1833 was witnessed in various parts of America, and was particularly decreed by Humboldt, who was then in South America.

He refers to a similiar display in A. D. 1766, but the day of the year is not given. An unsual number of shooting stars was noticed on the 9th of November, A. D. 1698. The Chinese records state that several hundred shooting stars appeared on the night of the 6th of November, A. D. 1602. (This and the following dates are, for convenience given in the new styles.)

Both in China and in Europe large numbers of shooting stars were witnessed on the 3d of November, A. D. 1833. On the morning of the 31st of October, A.

D. 1366, a most remarkable shower was witnessed in Europe. A similar shower occurred on the morning of October 26th, A. D. 1202. Falling stars are reported on the 23d of

October, A. D. 1101. The Chinese records speak of thousands of shooting stars on the 20th of October, A. D. 1002.

Both in Europe and in China large numbers of shooting stars were seen on the 19th of October, A. D. 934. In China they were seen October 21st A.

D. 931. But one of the most remarkable showers, as well as the first shower of this series of which we have any account, was on the morning of October 18th A. D. 902.

These years, it will be noticed, show very distinctly a cycle of about, the third of a century, while the day of the month has advanced quite steadily at rate of about three days in a century. It should be added that this list is not made up of selections from a large mass of similar records. It includes all the known recurrences of this phenomenon between A. D. 902 and A. D. 1799 that have happened within ten days of the proper time of the year of this shower.

After A. D. 1833, the number of meteors seen on the morning of the 13th of November, though, for a few years, somewhat greater than we see on ordinary nights, were yet inconsiderable, and, after five or six years, no one could claim unusual numbers on that morning. For the last three or four years, however, there have been distinct indications of the return of the November meteors. This was particularly manifest last year, inasmuch as single observers, on the morning of the 13th of November, witnessed about seventyfive meteors per hour. A party of four persons, at New Haven, counted 238 in an hour, and a party at Greenwich Observatory counted 250 in an hour. These numbers are, probably, five or six times as great as would be obtained on ordinary mornings. Nearly all the meteors, moreover, moved in paths diverging from the constellation Leo, which is a peculiarity of the November shooting

We cannot predict with confidence a greater display this year. The thirty three year cycle ends in 1866, rather than 1865, and hence such a display may be looked for .-But we must remember that for many returns of the period since A. D. 902 we have no account of a corresponding shower.

But for the experience of last year, the morning of November 14 would be named as the time to look for the meteors. But their occurrence then on the 13th, and not on the 14th, makes it necessary to look for them on either morning of this year.

They cannot be expected in great abundance until the constellation Leo is above the horizon, that is, until eleven o'clock. In previous displays, the maximum has usually been between 3 o'clock and dawn.

Previous displays have continued several hours, and have been visible over considerable regions. If the time of the shower falls this year between the mornings of the 13th ly attracted the notice of observers.

low a height of thirty miles, and probably do not appear at a greater height than one hundred and twenty-five miles. They move with great rapidity, having an average velocity of at least twenty-five miles a second, nearly or quite one hundred times the ordinary velocity of a cannon ball. In 1863 a considerable number of the November meteors were observed simultaneously at the Observatory and Coast Survey office in Washington, and by Prof. Gummere, Mr. Marsh, and others, at Haverford, Pennsylvania and Philadelphia. From these observations the true heights of between seventy and eighty paths have been computed. The mean altitude at appearance was ninety-six miles, and at disappearance, sixty-one miles. These results seem to show that the November meteors are fifteen or twenty miles higher than those of August.

It is generally admitted that shooting stars are small bodies moving in orbits like planets or comets, which encounter the earth and are burned up, or are dissipated, in the upper regions of the atmosphere. Groups of such bodies moving together, in a common direction, produce the August and Novem-

ber exhibition. The true November meteors proceed in lines radiating from the constellation Leo, or more exactly from the sickle in Leo. This radiation i due to perspective-the paths be-

in all parallel to each other. The following suggestions and questions to be answered are to be directed to obser-

1. Count the number of shooting stars that are seen in each half hour of either night .-If several persons count, have them look in different directions, and count aloud to prevent duplication. State the number of per-

sons counting. 2. How many of the meteors seen move in paths which if produced backward, would cut across the space bounded by the stars in the curve of the sickle in Leo, that is, by the stars Eta, Mu, and Epsilon?

3. How many of them have trains? 4. How many of the trains are white ?how many yellow? how many red? &c. 5. What differences are there between the November meteors and the ordinary stars? Compare those which radiate from Leo with those which do not.

6. If the meteors are very numerous, count the numbers visible in a telescope in each his only child, a little boy eight years old. hour. Direct the telescope to some point at

of the telescope, &c. 7. If the meteors visible to the naked eye amount of stock in Belcher's Sugar Refining

few degrees apart, and count the number of paths that actually cut across the line join-What is the average length of the visible

9. What is the average duration of flight? or how many degrees do they move in a second?

from Leo referable to any other radiant; pargeneral interest to serve as reply to inquires ticularly, do they proceed from near the handle of the dipper? 11. When persistent trains float slowly away, what is the direction and velocity of

the motion? 12. Extent of obscuration by haze may be measured by noting the smallest stars visible near Polaris. 13. Can anything peculiar be seen in the

telescope during the daytime, particularly on 14. It is very important (and yet not easy) to determine exactly the radiant. It is apparently a small area, and not a point. -What are the limits of this area? Is it possible to determine in which direction is its

greater diameter? 15. Whenever any meteor has any pecu liarity, such as peculiar brilliancy or color, or persistent train, and by which it can be iden tified, note carefully its apparent path among the stars. This may be done by drawing its path upon the charts published by the Connecticut Academy and the Smithsonian Institution, or the stars near which, or to which or from which, it is moving may be noted, together with the distance from those stars. Meteors leaving persistent trains are bes adapted to these observations. When such a star is so observed at two stations its attitude can be determined. The exact time (hour, minute, and second) of the appearance of such meteor is very important as a means of identification.

16. Keep note of the observations made.-Recollections are of little value. Do not try to do too much. Do a little well. And finally, send the results of observations to the Smithsonian Institution, or to the Connecticut Academy, for collation and preserva-

YALE COLLEGE, November 3, 1866. A ROMANCE IN REAL LIFE.

MOTHER CLAIMS HER CHILD-AFFECTING SCENE IN COURT.

A very affecting scene took place in the Supreme Court Chambers in New York, before Judge Barnard, one which, for the time, brought tears to the eyes of nearly every spectator. It appears about six years ago one Mrs. Barrett left a babe, named Edward Barrett, twelve days old, with a woman named Mrs. McCabe. From that time till now Mrs. McCabe has brought up, supported

and educated the child The mother went South, married again, and after a lapse of the above time, came to claim her off-spring. She asserted her cause with all the eloquence of a mothe'r heart .-Mrs. McCabe set forth that she was tenderly attached to the child; that she had expen ded a considerable sum on its behalf. also produced letters from an eminent physician showing that the child had been as it were snatched from death. The little boy, on being called on to go to his mother, clung to Mrs. McCabe, and resolutely refused to go to his real parent. This produced quite a scene. The mother, in a heartrending tone, exclaimed:

"Oh, Judge! Judge! Don't give my child away-my heart will break-it will break !" "Don't break the child's heart," tearfully but energetically responded Mrs. McCabe. The Judge for a few moments, was evi-

"My good woman, (to the mother,) your case is a hard one; but your child is of tender age, delicate in health, and evidently attached to the people who have always brought him up. If I give him to you now, and you take him South, he will surely die, I will let him remain where he is for one year By that time he will be stronger and healthier; then, if you apply again, your application may be granted.

Counsel for the mother here said that Mrs. McCabe had offered to give up the child, if she was paid \$50.

This Mrs. McCabe denied Judge Barnard said that if \$75 were wanted to get the child back, the mother should call on him, and he would give it to her. "I do not want to sell the child." said Mrs. McCabe.

The parents then left the court, the mother sobbing with grief, but the boy clinging to Mrs. McCabe's neck with an intensity of affection almost painful to witness.

AN EDITOR IN HEAVEN.-Under the foregoing caption an exchange gives a long obituary notice of a deceased brother editor. and 14th, it may appear only to those on the from which we have room only to extract the otherside of the earth. Thus, in 1832, the closing paragraph: "Should we not rejoice display was exclusively European, although that our late friend of the scissors and quill we had clear skies, while in 1833 this conti- is in heaven? In that paradise where the nent alone enjoyed the exhibition. So, in cry of "more copy" will never again fall on 1799, a grand display was witnessed in his distracted ears. There his enjoyment America, while in Europe a few meteors on | will no more be interrupted by the growls of the unreasonable subscribers, or the duns of Shooting stars appear in the upper regions | the paper maker. There he will enjoy entire of the atmosphere. They rarely descend be- freedom from the detractions and misrepresentations of political opponents, and the caresses of ambitious political aspirants. In that blest abode he is no more to be troubled with illegible maauscript or abominable poetry. No rival editor will there steal his thunder or his items, and typographical errors shall know him no more forever.'

> MILLIONS OF MONEY .- An aged man, who was a prominent merchant in this city in the time of the war of 1812, was asked the other day how many men there were at that period supposed to be worth a million of dollars .-The answer was: "Not one. We never talked about millionaires; we never thought about millions as belonging to individuals.' A gentleman well known in this State says that he was at a dinner party in Albany last winter, gathered not with reference to wealth, but for other reasons, where he counted at table eight men, among those thus casually collected, who were worth over a million each; and every one of them had begun life in actual poverty.
> Such is the growth of our country, and

such is the quality of the men it produces.

-N. Y. Post. A DUKE'S ADVENTURE.-The Duke of Hamilton and Mr. Thos, Wombwell had a strange adventure after the recent Deanville races in France. Having missed the train, and being very anxious to return to London, the Duke went to the coast to charter a vessel to convey him and his friend to Brighton, for the use of which they had offered one thousand francs. The police, hearing that two strangers were offering fishermen large sums of money to convey them to England pounced down upon Mr. Wombwell as one of the two "welchers" who had bolted from the race course with the pools. On the return of the Duke a short explanation set the matter right.

THE WILL OF A WEALTHY MAN.-The will of Henry Ames, of St. Louis, Missouri, who died recently from paralysis, makes the following bequests: \$200,000 to his widow, \$50,000 to her daughter by her first marriage and \$100,000 to the O'Fallon Institute, which is a liberal institution of learning, something after the plan of the Cooper Institute in New York. The balance of his property goes to The whole estate is valued at \$1,500,000 .a distance from the radiant—say to the North pole. Report the size of the object glass, diameter of field, magnyiying power, direction | Lindell Hotel, a valuable block on Fourth street, called Vocanian row, and an immense

Office hours from 9 A. M. to 6 P. M.

will be given.

And can be consulted on DEAFNESS, NOISE IN THE HEAD, CATARRH, DISCHARGES FROM THE EAR, SCALES IN THE EAR, ACCUMULATION OF WAX IN THE EAR OBSTRUCTION OF THE EUSTACHIAN TUBE, and all Acute or Chronic Diseases of the EAR and AIR PASSAGES.

ARTIFICIAL EYES,

Inserted without PAIN, and perfectly resembling the natural eye. Operations for CATARACT, STRABISMUS or CROSS EYE, Artificial Pupil, &c., skillfully performed, and all discuses of the

EYE AND EAR

treated, and every operation in Aural and Opthalmic Surgery, performed by

DOCTOR GARDNER.

CIRCULAR.

Principal Office, 84 West Fortieth street, New For reference, Testimonials, &c., send for

Opinions of the Press.

The Louisville Journal says: "The testimonials which Dr. Gardner presents to the public could never have been obtained, except by the display of great skill and learning in his profession. One thing especially commendable in the Doctor's practice is, that he will not attempt an incurable disease for the sake of a fee, but frankly tells the patient whether he can be cured or not. We cheerfully recommend Dr. Gardner to the attention of all our friends who may be suffering from diseases of the eye or ear."

The Richmond Times says: "We have no hesitation in saying that Dr. Gardner is the most scientific and successful eye and ear Surgeon in

"Dr. Gardner's treatment of the eye and ear is "We feel justified in recommending Doctor

Gardner to those suffering from diseases of the eye and ear."—Richmond Whig. "We can safely and cordially recommend Dr.

Gardner, who will fulfill all he undertakes to per-form."—Baltimore Clipper. The New Orleans True Delta says: "We can sately recommend Dr. Gardner as a successful operator on the eye and ear. He will not under take to treat a case unless a cure can be effected.

The Wheeling Register says: "Dr. Gardner is one of most successful Oculists and Aurists in the country. We advise those suffering from the diseases of the eye and ear to consult him."

Fever and Ague Extinguished.-Martyrs to Intermittent Fever, a word with you. The responsibility for your suffering rests upon yourselves. Just as surely as you shake to-day, or will shake to-morrow, HOSTETTER'S CELEthe disease under which you labor. Had you taken this genial tonic as a preventive, you would have no need of it as a cure, for it renders the system impervious to all miasmatic fevers. But since you neglected the precaution, rid yourselves without delay of the complaint by resorting to the only reliable remedy. Break the chills with HOSTETTER'S BITTERS, and they will return no more. This is the experience of thousands. and it will be yours. Quinine is a slow means of relief; it is nauseous to the last degree; it is more dangerous than the malady itself; in many cases it utterly fails. How different is the effect of the BITTERS. Their curative action is rapid; they are agreeable to the palate; they are not only entirely harmless, but tend inevitably to strengthen the constitution and prolong life; they never have failed, and it is confidently assumed that they never can fail in any case of Fever and Ague however inveterate in its character. To be with out HOSTETTER'S BITTERS in any region infested with Intermittent or Remittent Fever is

simply to reject safety and court disease. 42 -w4t To Consumptives.

The Advertiser, having been restored to health in a few weeks, by a very simple remedy, after having suffered several years with a severe lung affection, and that dread disease, Consumption-

is anxious to make known to his fellow-sufferers the means of cure. To all who desire it, he will send a copy of the prescription used, (free of charge,) with the directions for preparing and using the same, which they will find a SURE CURE FOR CONSUMPTION. ASTHMA, BRONCHITIS, &c. The only object of the advertiser in sending the Prescription, is to benefit the afflicted, and spread information which he conceives to be invaluable; and he hopes every sufferer will try his remedy, as it will cost them nothing, and may prove a blessing. Parties wishing the prescription, will please REV. EDWARD A. WILSON,

HOUSEKEEPERS.

SALE OF CHARLOTTE "NAVY YARD.

Bureau of Refugees, Freed. and Aband. Lands. HEADQUARTERS ASST. COM., STATE OF N. C. RALEIGH, N. C., Nov. 1st, 1866.

IN COMPLIANCE WITH INSTRUCTIONS In COMPLIANCE WITH INSTRUCTIONS from the Commissioner of Bureau of Refagees, Freedmen and Abandoned Lands, dated Washington, September 28th, 1866, and by virtue of suthority given in section 12 of the act of Congress passed July 16th, 1866, entitled "An Act to continue in force and to amend 'An Act to establish a Bureau for the relief of Freedmen and Refugees,' and for other purposes." I will sell at Charlotte, N. C., on the premises, at public auction, to the highest bidder, on

Monday, 3d day of December, 1866,

Between the hours of 10 A. M., and 2 P. M., the following property formerly belonging to the so-called Confederate Government:

Two lots, 100 feet front each on Trade Street, and about 612 feet deep, designated in the plan of said town, as lots 237 and 238, in square 36, being property formerly owned by Wm. Allison, deceased, and sold under a decree of a Court of Equity for purposes of partition, &c. Said property was conveyed to the so-called Confederate States Government, by E. Nye Hutchison and John Wilkes, of the County of Mecklenburg and State of North-Carolina, by deed dated July 13th, 1863.

These lots are to be sold without the buildings thereon, except a two story frame house, 37 x 32 on lot 237, which will be sold with the lot.

This is a valuable property, having a front upon one of the principal streets of Charlotte, and running up to the N. C. Railroad, making it the most desirable in the city for mercantile or manufacturing purposes.

ing purposes.

I will also sell on the same day, on the Fair grounds of the Mecklenburg Agricultural Society, eight or more frame buildings built and used by the so-called Confederate Government as hos-

pitals.

TERMS:—For the real estate, Cash, in Government funds, on the delivery of a warranty deed therefor, in the name of the United States; for the buildings, Cash, in Government funds on the day of sale, the buildings to be removed within five days thereafter.

THE UNION REGISTER.

On the first of December following, the Union Publishing Company will commence the pub-

THE UNION REGISTER, at Greensboro', N. C. The above named Journal will be a Weekly, of large size, and printed with new type and material, devoted to the consistent and manly vindication of true Union principles, "with malice toward none, and with charity for all." It is believed that a Journal of such charac-ter is emphatically demanded by the Union men of this portion of the State, and we desire to sup-ply this need, and at the same time afford to all

a newspaper worthy of patronage, as a literary and business Journal, alive to the interests and welfare of all classes of readers. The Union Register will have no political utterances to ignore or deny, but will be, from the beginning, thoroughly and unreservedly loyal.

Greensboro' has been fixed on as a point favorable to the publication of such on account of its

central location, and peculiar telegraph and rail-road communications, and the well known enter-prise of its inhabitants. Terms of Subscription. For one year, single copy,
For six months, single copy,
For one year, clubs of ten,
Payable invaribly in advance.

UNION PUBLISHING COMPANY Nov. 10, 1866.
